Education

Bahcesehir University

Expected Graduation: November 2025

Bachelor's Degree of Software Engineering

Istanbul, Türkiye

- Courses: Object Oriented Programming with Java, Software Engineering Analysis and Design, Wissen - Cross Platform App.Development, Software Architecture, Introduction to Quantum Computing, Data Structures and Algorithms, Introduction to Artificial Intelligence & Expert Systems, Advanced Programming with Python.

Work Experience

SunExpress Airlines

Aug 2025 – Oct 2025

Software Engineer Intern

Antalya, Türkiye

- Developed and maintained enterprise-level web and mobile applications using **ASP.NET Core Web API**, **React.js** and **React Native** delivering scalable and user-friendly solutions.
- Collaborated with the Business Airline Solutions team to design and implement digital products tailored to the aviation industry, enhancing operational efficiency and customer satisfaction.
- Gained hands-on experience in **C#**, **REST APIs**, **JWT** based authentication/authorization, **Postman** testing processes, and modern front-end frameworks, strengthening full-stack development skills in a real-world enterprise environment.

Llux

Sep 2023 – Oct 2024

Founder

- Founded and managed Llux, an independent e-commerce venture, overseeing all aspects including company establishment, product sourcing, operations, and digital marketing.
- Successfully launched and sold products across multiple e-commerce marketplaces, achieving an **8.8 customer satisfaction rating**, demonstrating strong commitment to quality and service.

Projects

Ticketly - Flight Ticketing System | [Source Code](#)

ReactJS | TypeScript | .NET Core Web Api

- Developed a full-stack flight ticketing system leveraging **ASP.NET 8** with **EF Core** and **SQL Server** on the backend, and **React** with **TypeScript** on the frontend. Implemented **JWT authentication** with role-based access, **Redis** caching for performance, **Serilog** for structured logging, and **Swagger/OpenAPI** for API documentation

ML-Based Cryptocurrency Price Prediction and Signal Generation Model LSTM | React | Flask | WebSocket

- Designed an AI-powered crypto trading platform using **Python (LSTM, Random Forest)** and **TensorFlow** for price prediction, with a **React** frontend featuring real-time charts, technical indicators, and **REST/WebSocket** integration for live market data.

TaskMaster Project Management Tool | [Source Code](#)

JavaScript | SQL Lite | Django

- Built TaskMaster, a collaborative project management web app built with **Django** and **JavaScript**, featuring a drag-and-drop Kanban board, role-based access control, real-time notifications, and advanced team/project/task relationships for effective progress tracking.

Technical Skills

Languages: C#, Python, Java, JavaScript, TypeScript, SQL (MS SQL, MySQL, SQLite), MongoDB

Developer Tools: Git, Docker, Microsoft Azure, Postman, Swagger/OpenAPI

Libraries/Frameworks: ASP.NET Core Web API, Django, Flask, React, React Native, Entity Framework Core, Bootstrap

Leadership & Activities

BAU Financial Research and Implementation Center | Bulletin Editor & Financial Analyst Nov 2021 – Jan 2023

- Led editorial efforts for a comprehensive financial bulletin, covering diverse areas including global markets, Turkish markets, cryptocurrency markets, and commodities.
- Provided technical insights and forecasts in forex and cryptocurrency markets to support editorial content.

Athlete

2015 – 2022

- Professional Kickboxing Athlete.
